

Grow your client roster *without growing your team.*

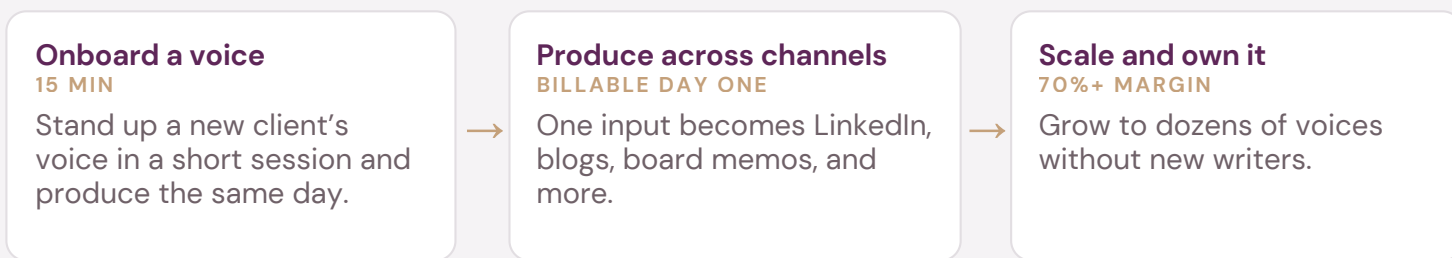

Eve learns how each executive thinks and writes, then produces their content across every channel in their voice, at your direction.

Stand up a new client **in minutes.**

What is Eve?

Eve is an AI-native platform that turns your thinking into publish-ready content. It learns your voice and your business, then turns a short conversation into polished drafts in minutes. The best of AI speed with expert human judgment, so everything sounds like you.

How it works

Key features

What makes it a system, not a chatbot

All of it, one system.

Run every client's content from one place.

Editorial coaching

Lifts every draft, so your team approves, not rewrites.

Approvals built in

Every client's content goes through your review process.

Dynamic calendar

A living calendar for every client or team.

Multi-client workspace

A home for each client's voice and content.

Key benefits

- **A service you own**
Recurring revenue on your books. The client relationship and the margin stay yours.
- **Billable on day one**
Every new client or hire produces the same week. No three-month ramp before the invoices start.
- **Software margins**
Many client voices on one system. **9 in 10** drafts ship with light edits, so margin holds past **70%**.

How to get started

- **Pilot**
Stand up a single voice and prove it in a week.
- **Your Roster**
Run many client voices on one system, no new writers.
- **Eve, as a value-added service**
Tailor your service to every client. Extend Eve to them directly when it makes sense.

"Clients kept coming to us after firing a PR shop, asking if we could do better. Now we say yes and mean it, without adding a single writer."

—Managing partner, B2B Marketing Agency

Make Eve *your unfair advantage.*

Book a 20-minute walkthrough. We will show Eve in a voice you will recognize, then map the economics for your roster.
