

Your thinking. Your voice. *Everywhere it matters.*

Eve is the Executive Voice Engine. It learns how you think, then turns a single voice memo into publish-ready content across every channel. Every piece starts at 90%, not zero.

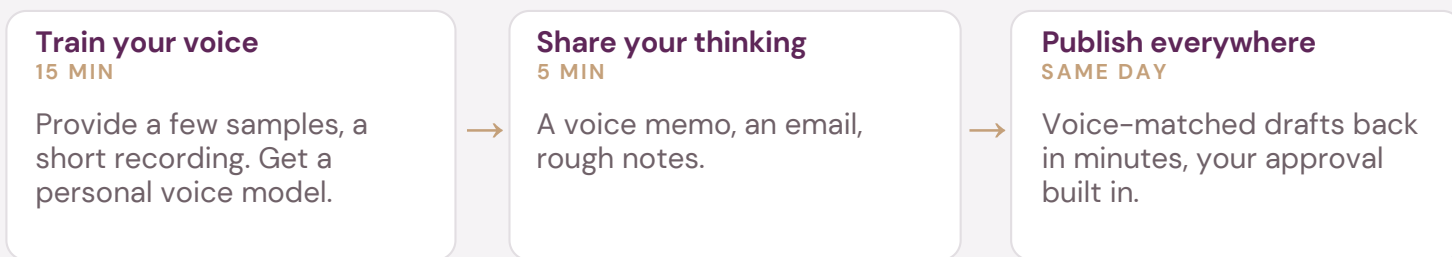

Eve is not a chatbot you re-prompt. **It's a system that remembers exactly who you are.**

What is Eve?

Eve is an AI-native platform that turns your thinking into publish-ready content. It learns your voice and your business, then turns a short conversation into polished drafts in minutes. The best of AI speed with expert human judgment, so everything sounds like you.

How it works

Learns how you think, sharper with every edit

Key features

A scalable system that works with your team

Daily presence in under an hour a week

Every channel, from one short input

Editorial coaching

Flags weak angles, suggests stronger framing.

Approvals built in

Nothing publishes without your sign-off.

Dynamic calendar

A living calendar. React without redoing the plan.

Multi-author workspace

Collaborate as a team across distinct exec voices.

Key benefits

- **Publish more, edit less**
9 of 10 drafts ship with light edits.
- **Always visible**
Daily content, under **an hour** a week.
- **Less writer overhead**
Every draft starts at **90%**. Pivot your strategy in **15 minutes**.

How to get started

- **Just you and Eve**
Send your ideas when inspiration strikes, get publish-ready drafts back.
- **Your team**
Marketing is built from one shared system with personal models for each voice, backed by brand strategy.
- **Eve Studio**
Our content team runs Eve, while you supply the raw thinking.

"Eve is a total game changer. It sounds just like me, so no one noticed when I switched to Eve. I went from ten hours a week spent on content to one, giving me back the time I needed to scale my company. I can't imagine my business without it."

—Carlos Caro, Managing Partner, New Market Growth

See it *in your own voice.*

Book a 20-minute demo and we will build a sample post in a voice you will recognize.
