

# Your thinking. Your voice.

## Everywhere it matters.

Eve is the Executive Voice Engine. A **voice model** built in 15 minutes — capturing how a leader thinks, argues, and frames ideas — then turns input into publish-ready content across LinkedIn, blogs, newsletters, and more. **Eve is a system, not a chatbot.**

01

### Train your voice — 15 min

Upload writing samples and a short recording. Eve builds a **persistent voice model** from your actual language — not a prompt template.

02

### Share your thinking

Drop a voice memo, an email, or rough notes. Eve picks up **context, intent, and audience** — no briefing required.

03

### Publish everywhere

Polished drafts in minutes — **LinkedIn, blog, newsletter, event prep**. All in your voice. Workflow and approvals built in.

## BUILT FOR HOW YOU WORK

01

FOR PR &amp; COMMUNICATIONS AGENCIES

### Scale without hiring

*We can't take on more clients without more writers.*

Onboard a new client voice in 30 minutes. Isolated models per brand. Scale from 8 to 20 clients without adding headcount.

**70%+** margins on new content service

02

FOR IN-HOUSE MARKETING TEAMS

### Async executive input

*Our CEO has great ideas but never has time to sit down.*

Capture executive thinking in voice notes, on their time. Brand guidelines embedded in every draft. Ends the ghostwriting grind.

**10+** hours/week back to the team

03

FOR INDIVIDUAL EXECUTIVES

### Show up everywhere

*I know I should be posting but I don't have the bandwidth.*

Multi-channel adaptation, not repurposing. Three paths: in-house, matched strategist, or solo. Real-time response for news and events.

Consistent presence in **<1 hr/wk**

## COMPARE AGAINST

vs. **generic AI**

**Trained on your voice — and persistent.** Eve doesn't re-learn each session. One voice model, sharpening with every use. Generic AI resets every prompt.

vs. **DIY / your team**

**One source of truth — not scattered prompts.** Brand guidelines embedded. Workflow and approvals built in. Your team works from the same model, not ten different ChatGPT threads.

vs. **ghostwriters**

**15 minutes, not 2–4 weeks. \$1,500, not \$3–5K/month.** And the voice gets sharper over time instead of restarting with every new writer.

## PROVEN IMPACT

15 min

to a **voice model** that captures how a leader thinks, argues, and frames ideas

&lt;1 hr/wk

of **executive time**. Consistent presence across every channel

9 of 10

**drafts ship** with light edits. Gets sharper with every use

*Based on internal benchmarks.*
